Flexibox scalable Infrastructure allows the flexibility of easy scaling, no expensive equipment purchases, no long-term commitments, and includes everything you need to have a secure, effective, and safety compliant IT infrastructure for your company, including 24/7 support. This small footprint server, with enterprise class firewall, and business continuity on-site, and off-site backup that meets all safety, and security compliances. CGPC Solutions provides excellence in enterprise class equipment fully serviced and supported. When it's time to replace equipment and the operating system, well that is included too. Your all-inclusive server infrastructure includes support for hardware failures, backup recovery, network security management, monitoring and hardware replacement. There are no additional or hidden costs.
